EXPERIENCE

UI/UX Designer & Front-End Developer
AnyTask.com | Feb 2023 — Present

Contributed to the design and development of a large-scale platform used by 15,000+ users across 140+ countries, improving user experience through new features, interaction design and a full platform UI redesign.

- Collaborated in an agile team on feature planning, UI design and interaction decisions
- Led a platform-wide UI redesign in Figma across mobile, tablet and desktop
- Designed a customisable dashboard with draggable and resizable widgets
- Designed a Quick Message overlay enabling users to contact sellers without leaving the page, improving communication flow and engagement
- Designed and implemented a real-time messaging interface with threaded conversations, read receipts and file uploads.
- Designed a real-time messaging interface with threads, read receipts and file uploads
- Designed and implemented Algolia-powered search with filtering and sorting
- Built and maintained 50+ reusable Vue components forming a scalable UI system.
- Improved UX performance through lazy loading and optimised search interactions
